

# Xponentially Efficient, Smooth & Reliable

Tim Hull

## Yanmar JH Series (39mhp - 125mhp)

- Envious power and torque output
- Outstanding power-to-weight performance
- Low noise, low vibration and typical Yanmar reliability
- Class leading fuel economy
- Charter boat proven

The Powerful Gem

---

"When you operate an exclusive executive charter boat, customers have a right to expect the absolute best. On board Xponential the last thing that guests wish to confront are noisy, smoky diesel engines.

With a pair of Yanmar JH series in my engine rooms, combined with a set of optional electronic controls, I have the best of both worlds; smooth controls coupled to a 'bullet proof' purpose built marine engine, one that is well proven and in use with leading charter fleets worldwide.

I did my research before selecting the Yanmar JH series and after 2.5 years of successful operation I have absolutely no regrets. They deliver heaps of power to get the big Scimitar 1010 moving. When underway the engines are quiet, super fuel efficient and smooth.

Not only can I cruise comfortably at 17 knots, but with a fuel burn of 10 liters per engine/hour plus low maintenance costs, I am pleased to say I made the right choice."

Yanmar – the best diesel afloat."
