

YANMAR

Yanmar Powers to The Rescue

Steber and Yanmar once again combine to make boating safer with the launch of the Yanmar powered Steber 38 for Marine Rescue NSW.

Built to stringent survey specifications the Steber 38 is renowned for its excellent sea going qualities and high quality construction. NSW Marine Rescue elected to fit dual 6LY3-STP engines and the outcome impressed with a top speed of 32.6 knots and a very economical cruise speed of 21.6 knots being achieved at only 2437rpm.

"When it comes to heading out to sea in wild weather you need to be 100% confident that everything in the engine room is up to the task. We know Yanmar marine engines are fit for the purpose. At Steber, we have fitted plenty of them for both pleasure and commercial operators and we have not been disappointed yet!

Yanmar – great for Steber and great for sea safety too"
