

• Baffled air intake duct is designed to minimize noise.

• Tough, powder coated finish.

• Large, deep offset air outlet ducting reduces noise.

• Sandwich layered foam and noise dampening ducting for optimal sound attenuation.

• Removeable panels with easy-to-use trigger latches.

For NL Generators

40-185 kW
60 Hz / 1800 RPM

33-155 kW
50 Hz / 1500 RPM

Superior engineering and meticulous craftsmanship are standard features in a line-up of super attenuated sound enclosures worthy of the name Northern Lights.

Our sound enclosures are designed to allow easy access to the simple, single-side serviceability of Northern Lights generator sets. Northern Lights sound enclosures feature easy-to-use trigger latches for quick access to your 60 Hz; 40-185 kW (50 Hz; 33-155 kW) generator set. Disassembly of the enclosure is never required for routine service and maintenance. You will also appreciate how easy the enclosures are to install - less time is required for installation to save on overall expenses.

Because of their construction materials, Northern Lights sound enclosures are remarkably light-but never at the expense of durability or function.

No detail has been overlooked in engineering these enclosures to optimal sound attenuation. Internal ducting maximizes attenuation without restricting airflow. The ventilation openings in the panels have been offset to eliminate the line of sight, helping to keep your engine room quiet.

Five layers of firm and flexible sound dampening materials absorb low-, mid- and high-frequency noise and vibration. The enclosure is engineered for maximum attenuation with sandwich-layered foams. The protective film coating ensures safety and longevity by guarding the foam from damage and absorption of oil, fuel and coolant. The whole package is coated white with a tough, powder-coat finish to further protect and beautify your equipment.

Northern Lights sound enclosures are backed by an unmatched, transferable global warranty. Northern Lights' worldwide dealer network is more than 300 strong, and Northern Lights' helpful dealers offer parts, accessories, and services in more than 40 countries.

Your Northern Lights super attenuated sound enclosure is a terrific investment in a quieter and more aesthetic engine room. It's the ideal complement to your reliable, durable and simple to use Northern Lights generator.
