

Vic Goy

# I Halved My Fuel Consumption

Vic Goy spends his working life at sea, training commercial skippers on his 17 metre fibreglass vessel Delphinus. So when the existing VEE 8 two stroke diesel engines fitted to Delphinus showed signs that a rebuild was imminent Vic started to consider his repower or rebuild options.

“I asked my students, many of whom were operating boats powered by Yanmar’s, and they were glowing in their endorsement of the Yanmar brand. Probably the best advice that I got was from the professional fisherman who recommended Yanmar by name and who spoke favourably of their low fuel usage.

I looked at many brands but after much research I installed a pair of Yanmar 6CX-GTYE diesel engines with the optional Twin Disc “Quick Shift” transmissions and Twin Disc Electronic Controls. Now my 24 tonne training boat cruises faster, fuel consumption has halved, noise levels are much reduced and the slow speed control much improved.

I am a very happy Yanmar owner and operator, these Yanmar’s have delivered everything that I had hoped for and more.”

**Yanmar 6CX-GTYE**  
 400 mhp (294 kW)

- Direct injection for direct fuel savings
- Low Noise, Low Vibration & typical Yanmar reliability
- 500hr service intervals
- Mechanical Fuel System for simplicity and reliability
- Conforms to IMO emissions
