

Yanmar - Champagne Performance

Sea Wind Catamarans launched their 1160 model to achieve instant national acclaim, taking out the 2005 Australian Sailboat of the Year plus the Best Multihull Cruiser in the USA 2007.

For this phenomenal vessel, Seawind specified dual Yanmar 3YM30C Sail Drive engines matched with the renowned Gori 3 blade folding propeller with unique Overdrive feature for a no fuss, premium quality propulsion system.

Seawind 1160 owners will appreciate the classic Yanmar marine diesel attributes of smooth power application, ample torque to accurately manoeuvre 6.5 tonnes of boat, superior power to weight qualities and Yanmar's legendary miserly fuel consumption. The perfect package is rounded out with whisper quiet operation and smoke free performance.

Wherever a Seawind owner travels through Australia or the rest of the world, Yanmar technical support and service parts are close at hand.
