

YANMAR

POWER PROFILE

Application:	Recreational Game Fishing
Vessel Construction:	GRP
Vessel Name:	
Vessel Owner :	
Length (LWL/LOA):	LWL = 24' / LOA = 26'
Weight:	4,000kg
Engine:	Yanmar 6LPA-STZTP2
Engine Power Rating:	
Drive configuration:	Yanmar ZT370 (E)
Gear Ratio and Model:	1.78 : 1
Cruise Speed /Fuel Consumption	17>24 knots / 25>35 L/hr
Top Speed:	32 knots fully loaded
Propeller Size:	20" & 20"
Technician Name:	Steve Parsons / Craig Hurst
Date of Operational check:	04/03/2015
Sold by:	Craig Hurst Engineering
Repower & Installation Completed By:	Craig Hurst Engineering

YANMAR

POWER PROFILE

Comments:

Originally fitted with a pair of 4.3 Lt. V6 Gasoline MerCruisers and Alpha GenII sterndrives, the owner of this vessel was at the point of either selling his pride and joy or investing in doing a re-fit that would provide years of trouble free boating and the economy of a diesel. Given that the vessel is mainly used at Bermagui on the South Coast of NSW for Game Fishing, Craig Hurst was the owner's choice of dealer to manage and complete such a project. A full 10 hour day covering some 90 nautical miles at various speeds see's the Yanmar 6LPA-STZTP2 return a total fuel burn of 57 Lts. for a day's Game Fishing. The customer can't believe how good the vessel now performs, how quiet it is at both idle and whilst under power at cruise and how much more room he has in the cockpit.
